Acknowledgements

The satisfaction that accompanies that the successful completion of any task would be incomplete without the mention of people whose ceaseless cooperation made it possible, whose constant guidance and encouragement crown all efforts with success.

We are grateful to our Project Guide Mr.P.Nagababu, Assistant Professor, Computer Science & Engineering for the guidance, inspiration and constructive suggestions that helped us in the preparation of this project.

At the outset we thank our Head of the Department Dr. S. Nagarjuna Reddy and our Honorable Principal Dr.K.Appa Rao for the moral support and the excellent facilities provided. We would also like to thank all the teaching and non-teaching staff members of Computer Science department.

We wish to express our warm and grateful thanks to people participated in the survey from the **Chevutur village,G konduru,NTR,Andhra Pradesh** for providing the answers in completing our Project successfully.

We thank all our friends who helped us sharing knowledge to complete the task in-time.

CHAPTER1:EXECUTIVE SUMMARY

This Community Service Project was carried out in **Chevutur village, G Konduru, NTR district**, with an aim to digitally and socially empower rural villagers, especially students, by bridging the digital divide and raising social awareness. The project addressed critical Sustainable Development Goals including Quality Education (SDG 4), Gender Equality (SDG 5), and Industry, Innovation, and Infrastructure (SDG 9).

Over a period of six weeks from **May 12, 2025 to June 23, 2025** the project team conducted a comprehensive community survey to assess the digital literacy needs and social challenges faced by villagers. Based on this data, an interactive web platform "**DigiGram**" was developed, offering educational videos and tutorials in Telugu to ensure easy accessibility.

The team organized and delivered practical, interactive awareness sessions using projectors, laptops, and mobile phones, covering essential topics such as smartphone usage, safe digital payments, identifying online frauds, online safety measures, access to government digital services, and crucial social issues including road safety, early marriage risks, and the importance of education, particularly for girls.

Learning Objectives and Outcomes:

1.To enhance basic digital literacy skills among villagers, enabling confident and secure use of smartphones and digital payment systems.

2.To raise awareness about common online scams and preventive safety practices, reducing vulnerability to fraud.

3.To educate the community on accessing essential government services online, promoting digital governance.

4.To increase knowledge about social responsibilities including laws on underage driving, legal age for marriage, and the value of sustained education.

5.To empower women and youth socially through targeted awareness and encourage gender equality.

6.To foster community engagement and participation in continuing digital education beyond the project tenure.

The project successfully improved digital literacy and social awareness in Chevutur village, as reflected in positive community feedback and active participation throughout the sessions.The initiative lays a strong foundation for continued digital empowerment and inclusive development in rural areas.

CHAPTER2: OVERVIEW OF THE COMMUNITY

About the Community: Chevutur Village, G Konduru , NTR District

Chevutur is a vibrant and enduring village situated in the **G Konduru mandal of Krishna district**, Andhra Pradesh. With a population of approximately 3,256 people across about 850 households, it is a closely bonded rural community that cherishes its Telugu heritage and preserves traditional customs, festivals, and communal values.

Historically, Chevutur has been an agrarian society relying heavily on farming as the primary source of livelihood. Paddy, sugarcane, and various other crops are cultivated following time-honored agricultural practices complemented by gradual adoption of modern farming techniques aimed at increasing yield. In addition to crop cultivation, animal husbandry plays a vital role in the village's economy, with many families raising cows. Cow milk production is not only a source of daily nutrition but also contributes significantly to local income as fresh milk is sold in neighboring markets.

The socio-economic landscape of Chevutur reflects typical rural dynamics, comprising small landowners, tenant farmers, agricultural laborers, and dairy farmers. Literacy rates are improving steadily, especially among younger generations, supported by local schools and outreach programs. Efforts to promote gender equality and education for all community members are evident and growing.

Over recent years, Chevutur has witnessed growth in small-scale entrepreneurial ventures such as shops accepting digital payments via PhonePay scanners, marking an encouraging shift towards digital economic participation. These new businesses, alongside local temples, which serve as cultural and spiritual centers, contribute to the social cohesion and vibrant public life of the village. The blend of tradition and emerging modernization embodies the community's aspiration for sustainable development.

Community values emphasizing respect, cooperation, honesty, and social responsibility remain strong, fostering a harmonious environment where people support each other. The villagers' increasing openness to digital literacy and technology promises to further empower them socially and economically, building a resilient and progressive future for Chevutur.

CHAPTER3:COMMUNITY SERVICE PART

During the six-week Community Service Project in Chevutur village, the team undertook a series of meaningful activities focused on bridging the digital divide and enhancing social awareness among the villagers. The project activities were designed to address the specific needs identified through an initial community survey and aimed to equip the residents with critical digital and life skills.

Activities Undertaken:-

1.Community Survey and Needs Assessment:

The project began with a detailed survey to understand the village's existing knowledge of digital technology and social issues. This enabled the team to tailor the educational content effectively.

2.Development of Digital Platform:

Based on survey findings, the team designed and developed the "manadigitalhelp" web platform featuring Telugu-language video tutorials on smartphone usage, safe digital payments, online fraud prevention, and access to government e-services.

3.Digital Literacy Sessions:

Interactive sessions were conducted in groups using laptops, and smartphones. Villagers were taught essential smartphone functionalities, how to use UPI apps like PhonePe and Google Pay safely, and recognize and avoid common online scams.

4.Social Awareness Programs:

The team educated villagers on critical social topics such as underage driving risks, legal age and consequences of early marriage, the importance of education (especially for girls), and road safety measures like helmet use.

5.Follow-Up and Feedback Collection:

Regular feedback sessions were held to gauge learning progress and address participant queries, ensuring continuous improvement of program effectiveness.

6.Values, Life Skills, and Technical Skills Acquired

Through this immersive community engagement, we acquired invaluable values such as empathy, social responsibility, and cultural sensitivity. They developed robust life skills including communication, public speaking, and problem-solving in real-world rural settings. Technically, students enhanced their competencies in digital platform development, content creation for community education, and hands-on experience in conducting field surveys and training sessions.

Overall, the project not only empowered the villagers digitally and socially but also significantly enriched the students' holistic learning, preparing them for future challenges in their professional and community-oriented endeavors.

ACTIVITY LOG FOR THE FIRST WEEK

Day & Date	Brief Description of the Daily Activity	Learning Outcome	Person In-Charge	Signature
Day – 1 19/05/2025	Began community survey in Chevutur village to identify digital literacy levels and social awareness.	Understood community needs and data collection techniques.	MADDIPUDI VENKATA SURYA KIRAN	
Day – 2 20/05/2025	Continued survey covering wider demographics including farmers, women, and youth.	Gained experience in conducting field surveys inclusively.	MAGINAM TIRUVANI	
Day – 3 21/05/2025	Collected and compiled survey data for further analysis.	Improved data organization and initial analysis skills.	MANABOTHULA HIMA SRI	
Day – 4 22/05/2025	Met with village leaders and local shopkeepers for project awareness and support.	Practiced community engagement and stakeholder communication.	MAREPALLI KAVYA	
Day – 5 23/05/2025	Finalized survey responses and identified key project focus areas for digital and social topics.	Built analytical and decision-making skills.	MOHAMMAD AQBALL	
Day – 6 24/05/2025	Prepared survey report and planned content development based on findings.	Enhanced reporting and project planning abilities.	MADDIPUDI VENKATA SURYA KIRAN	

WEEKLY REPORT
WEEK–1 (From Dt: 19/05/2025 to Dt: 24/05/2025)

Objective of the Activity Done:

To conduct an in-depth survey of Chevutur village to evaluate the digital literacy levels, social awareness, and socio-economic conditions. This baseline assessment aimed to identify specific needs and challenges faced by villagers concerning digital technology and social issues for targeted intervention.

Detailed Report:

The initial week was dedicated to conducting a comprehensive household and community-wide survey using structured questionnaires. The survey included various demographic groups such as farmers, dairy producers, women, shopkeepers using PhonePe scanners, children, and the elderly. Key aspects covered were smartphone ownership and usage patterns, internet access, familiarity with digital payment platforms like UPI, awareness of online frauds, and understanding of government digital services. Important social factors like education levels, primary occupations (agriculture, cow milk production), and traditional community practices were also documented. The survey results revealed significant digital literacy gaps, particularly amongst women and older adults, along with social issues that required attention such as education on road safety and early marriage risks. Alongside data collection, the team established strong connections with local leaders and digital service providers, fostering community engagement and ensuring smooth participation for the upcoming project phases. This foundational survey guided the selection of core topics and the design of educational content to be delivered over the following weeks.

ACTIVITY LOG FOR THE SECOND WEEK

Day & Date	Brief Description of the Daily Activity	Learning Outcome	Person In-Charge	Signature
Day – 7 25/05/2025	Finalized combined digital literacy & social awareness topics from survey results.	Prioritized community needs, improved integration skills.	MADDIPUDI VENKATA SURYA KIRAN	
Day – 8 26/05/2025	Developed educational content on smartphone use, payments, fraud, and social issues.	Strengthened capacity in multi-topic content creation.	MAGINAM TIRUVANI	
Day – 9 27/05/2025	Selected and incorporated YouTube videos on digital & social awareness topics in Telugu.	Enhanced skills in curating and evaluating multimedia content.	MANABOTHULA HIMA SRI	
Day – 10 28/05/2025	Prepared training session plans with role-plays and interactive discussions.	Gained experience in engaging participatory learning design.	MAREPALLI KAVYA	
Day – 11 29/05/2025	Coordinated with village leaders and arranged resources for awareness sessions.	Improved community engagement and resource management skills.	MOHAMMAD AQBALL	
Day – 12 30/05/2025	Tested content delivery via mock sessions and collected feedback for improvement.	Developed skills in public speaking and feedback incorporation.	MOHAMMAD AQBALL	

WEEKLY REPORT
WEEK–2 (From Dt: 25/05/2025 to Dt: 30/05/2025)

Objective of the Activity Done:

To develop and prepare integrated educational content covering digital literacy and social awareness topics identified in Week 1 survey. This included creating multimedia videos, presentations, and interactive materials in Telugu targeting key community needs such as smartphone usage, digital payments, fraud awareness, and social issues like road safety and early marriage. Also focused on training methods and community engagement plans.

Detailed Report:

During Week 2, the team synthesized survey data collected in the previous week to select priority topics for educational outreach. They created scripts and storyboards for video tutorials and developed presentation decks designed for rural audience understanding. Role-plays and participatory activities were incorporated to enhance engagement and impact. The team also liaised with community leaders for scheduling and logistic support. Feedback forms and evaluation mechanisms were designed to ensure quality and responsiveness during upcoming sessions. The combined digital literacy and social awareness training approach was tested in mock sessions within the team and refined based on critiques. The week concluded with the finalization of content and session plans, positioning the team for live community education starting in the following week.

ACTIVITY LOG FOR THE THIRD WEEK

Day & Date	Brief Description of the Daily Activity	Learning Outcome	Person In-Charge	Signature
Day – 13 02/06/2025	Started developing the "DigiGram" platform, focusing on layout and navigation suited to rural users.	Improved web design skills and understanding of rural usability requirements.	MADDIPUDI VENKATA SURYA KIRAN	
Day – 14 03/06/2025	Collected existing educational videos from YouTub related to smartphonebasics, digital payments, and social awareness topics.	Developed curation skills and knowledge of available digital resources.	MAGINAM TIRUVANI	
Day – 15 04/06/2025	Integrated curated social awareness and digital literacy video content into the platform structure.	Learned platform content integration and localization techniques.	MANABOTHULA HIMA SRI	
Day – 16 05/06/2025	Tested platform navigation and video playback on multiple devices for usability.	Gained hands-on experience with software testing and user experience design.	MAREPALLI KAVYA	
Day – 17 06/06/2025	Refined content layout and technical aspects based on peer feedback and usability tests.	Enhanced collaborative review and content adjustment skills.	MOHAMMAD AQBALL	
Day – 18 07/06/2025	Finalized platform for pilot testing with villagers and planned live awareness sessions.	Prepared for field deployment and community engagement.	MADDIPUDI VENKATA SURYA KIRAN	

WEEKLY REPORT

WEEK–3 (From Dt: 02/05/2025 to Dt: 07/05/2025)

Objective of the Activity Done:

To begin implementing solutions by developing the "manadigitalhelp" platform, integrating curated video content from YouTube for digital literacy and social awareness topics in Telugu.

Detailed Report:

The third week was dedicated to developing the "DigiGram" digital platform, designed specifically for the rural community of Chevutur village. The platform interface was developed to be user-friendly and accessible, with all content delivered in Telugu. Instead of creating original videos, the team sourced relevant educational videos from trusted YouTube channels that addressed smartphone usage, digital payments, online fraud prevention, and social awareness topics such as road safety and early marriage prevention. These curated videos were integrated seamlessly into the platform to provide engaging and culturally relevant learning resources. The team conducted extensive usability testing across multiple device types to ensure smooth navigation and video playback. Peer reviews and mock sessions were held to refine the platform's educational delivery approach. By the end of the week, the platform's framework was finalized and prepared for pilot testing with village groups scheduled for the next week. This step marked a critical transition from planning to active implementation, progressing towards the goal of holistic digital and social empowerment through accessible technology.

ACTIVITY LOG FOR THE FORTH WEEK

Day & Date	Brief Description of the Daily Activity	Learning Outcome	Person In-Charge	Signature
Day – 19 09/06/2025	Tested the "DigiGram" platform for functionality, navigation, and ease of use with sample community users.	Learned practical software testing and user feedback collection.	MADDIPUDI VENKATA SURYA KIRAN	
Day – 20 10/06/2025	Added new curated videos focusing on digital payments, online safety, and government digital services.	Gained experience in content curation and integration.	MAGINAM TIRUVANI	
Day – 21 11/06/2025	Conducted usability tests across different devices (smartphones, laptops) commonly used in the village.	Improved testing skills for multiple platforms and device compatibility.	MANABOTHULA HIMA SRI	
Day – 22 12/06/2025	Gathered user feedback on content clarity, navigation, and video relevance for iterative improvement.	Developed skills in collecting and analyzing user data for product refinement.	MAREPALLI KAVYA	
Day – 23 13/06/2025	Fixed bugs and UI issues identified during testing; optimized video loading times and accessibility.	Practiced problem-solving and technical improvements.	MOHAMMAD AQBALL	
Day – 24 14/06/2025	Finalized platform updates and documented test results.	Learned report writing and project documentation.	MOHAMMAD AQBALL	

WEEKLY REPORT

WEEK–4 (From Dt: 09/06/2025 to Dt: 14/06/2025)

Objective of the Activity Done:

To test the functionality and usability of the "DigiGram" digital platform and enrich it with additional informative videos focused on digital payments, online safety, and access to government digital services to better serve Chevutur village residents.

Detailed Report:

In the fourth week, the project team conducted thorough testing of the "DigiGram" platform to evaluate its performance, user experience, and content accessibility across multiple devices prevalent in the village, including smartphones and laptops. Usability testing involved checking navigation flows, video playback quality, and content accessibility in Telugu. Parallelly, the team integrated a wider range of educational videos curated from trusted sources addressing secure digital payment mechanisms, online safety precautions, and practical usage of various government digital schemes and portals. These additions aimed to expand the platform's scope and provide comprehensive digital literacy support. Feedback from initial user trials was gathered and used to identify and fix issues related to ease of content understanding and technical glitches. This rigorous testing phase refined the platform and ensured its readiness for larger scale deployment in the village, thereby reinforcing the project's goal of empowering villagers with critical digital and social knowledge.

ACTIVITY LOG FOR THE FIFTH WEEK

Day & Date	Brief Description of the Daily Activity	Learning Outcome	Person In-Charge	Signature
Day – 25 16/06/2025	Initiated community education sessions focusing on smartphone usage and basics of digital payments.	Enhanced teaching and communication skills in a rural setting.	MADDIPUDI VENKATA SURYA KIRAN	
Day – 26 17/06/2025	Educated villagers on safe online transactions, emphasizing OTP security and identifying scams.	Developed ability to explain complex concepts simply.	MAGINAM TIRUVANI	
Day – 27 18/06/2025	Introduced social awareness topics related to early marriage and its risks alongside digital lessons.	Learned integration of social issues with technical education.	MANABOTHULA HIMA SRI	
Day – 28 19/06/2025	Conducted interactive road safety awareness sessions including helmet usage and traffic rules.	Strengthened public engagement and awareness raising techniques.	MAREPALLI KAVYA	
Day – 29 20/06/2025	Gathered community feedback on session effectiveness and areas forimprovement.	Practiced feedback collection and adaptive teaching methods.	MOHAMMAD AQBALL	
Day – 30 21/06/2025	Coordinated follow-up sessions tailored to specific groups (women, youth) addressing their unique concerns.	Enhanced targeted educational planning and community liaison skills.	MADDIPUDI VENKATA SURYA KIRAN	

WEEKLY REPORT

WEEK–5 (From Dt: 16/06/2025 to Dt: 21/06/2025)

Objective of the Activity Done:

Delivered community education sessions focusing on smartphone use, safe online transactions, fraud detection, and related social issues like early marriage and road safety to empower villagers with essential digital and social knowledge.

Detailed Report:

During Week 5, the team conducted multiple community education sessions at Chevutur village. The focus was on instructing villagers on how to operate smartphones effectively, including making secure online transactions using UPI apps, recognizing and avoiding online scams, and understanding the significance of digital payments' safety measures. Alongside digital practices, the sessions incorporated awareness on social issues including early marriage prevention and road safety, emphasizing helmet use and traffic rules. The sessions involved interactive demonstrations, role-playing activities, and question-answer segments to ensure active participation. Feedback was collected after each session to refine the delivery method and content for better impact. This week’s activities significantly increased villagers’ confidence in using digital tools for daily needs and fostered awareness on crucial social issues, aligning with the project’s aim to bridge the digital divide and promote social responsibility within the community.

ACTIVITY LOG FOR THE SIXTH WEEK

Day & Date	Brief Description of the Daily Activity	Learning Outcome	Person In-Charge	Signature
Day – 31 23/06/2025	Held final wrap-up meeting and feedback session with community members and leaders.	Strengthened cooperative relations and feedback integration.	MADDIPUDI VENKATA SURYA KIRAN	
Day – 32 24/06/2025	Conducted additional sessions for villagers who missed prior education programs.	Developed flexibility in outreach and inclusive teaching approach.	MAGINAM TIRUVANI	
Day – 33 25/06/2025	Follow-up visits and counseling focused on reinforcing safe practices in online payments.	Strengthened personalized education and follow-up skills.	MANABOTHULA HIMA SRI	
Day – 34 26/06/2025	Coordinated with local authorities for sustained digital literacy advocacy efforts.	Gained strategic planning and stakeholder collaboration skills.	MAREPALLI KAVYA	
Day – 35 27/06/2025	Prepared comprehensive project completion report and documentation for submission.	Enhanced report writing and project management skills.	MOHAMMAD AQBALL	
Day – 36 28/06/2025	Organized closing ceremony thanking contributors and planning future - digital literacy initiatives.	Fostered community relationship building and sustainability planning.	MOHAMMAD AQBALL	

WEEKLY REPORT
WEEK–6 (From Dt: 23/06/2025 to Dt: 28/06/2025)

Objective of the Activity Done:

To conclude the digital literacy and social awareness project by conducting final wrap-up meetings, additional focused sessions, follow-ups, and preparing comprehensive documentation for project completion and future sustainability.

Detailed Report:

The sixth week was dedicated to consolidating the project's impact and ensuring sustainable steps forward. Activities included a final wrap-up meeting with community members and leaders to discuss outcomes and gather feedback. Additional educational sessions were delivered for villagers who missed initial rounds, focusing on reinforcing key digital and social skills. Personalized follow-up visits were conducted with emphasis on safe digital payment practices. Collaborative efforts with local authorities aimed at establishing a continued digital literacy advocacy network. Essential project documentation and completion reports were prepared to summarize achievements and lessons learned. The week culminated with a closing ceremony acknowledging all contributors and planning future digital literacy initiatives, ensuring the sustainability of the community empowerment efforts.

CHAPTER5:OUTCOMES DESCRIPTION

Details of the Socio-Economic Survey of the Village/Habitation:-

A socio-economic survey was conducted in Chevutur village to understand the demographic characteristics, educational status, digital access, and social awareness of the community. This survey formed the baseline for designing effective digital literacy and social awareness programs tailored to community needs.

Survey Questionnaire:-

The questionnaire was structured into six key sections for clear and comprehensive data collection:

Section 1: Personal Information

Name of Respondent

Gender

Age

Occupation (Student, Employee, etc.)

Education Level

Section 2: Smartphone & Internet Use

Do you own a smartphone?

What do you mainly use your smartphone for?

Do you know how to install or delete mobile apps?

Do you know how to connect to Wi-Fi or mobile data?

Section 3: Digital Payments

Have you used UPI apps (Google Pay, PhonePe, PayTM)?

What do you use them for?

Do you feel confident using these apps alone?

Section 4: Online Safety Awareness

Have you received suspicious messages or links?

Do you know how to block/report fraud?

Do you know how to create strong passwords and use two-factor authentication?

Section 5: Government Apps & Services

Have you heard of government apps like DigiLocker, Aarogya Setu, Mera Ration, UMANG?

Do you know how to access online government schemes?

Section 6: Suggestions

What topics would you like to learn more about?

If you selected “Others”, please specify the topic you’re interested in.

This questionnaire was administered in the local language (Telugu) to ensure accurate responses. The data collected helped identify the digital literacy level and social awareness gaps in the community, guiding efficient project planning and deployment.

Problems Identified in the Community

During the socio-economic survey and initial assessments conducted as part of the community service project, several critical issues were identified that hinder the digital and social development of the Chevutur village community:

1.Limited Digital Literacy:

Although smartphone ownership was high, a significant portion of villagers lacked adequate skills to operate smartphones effectively. Many were unaware of basic functions, such as installing or deleting apps, connecting to Wi-Fi, and navigating mobile interfaces.

2.Low Confidence in Digital Payments:

Several community members used UPI apps but lacked confidence in conducting transactions independently. Concerns about security, fear of fraud, and unfamiliarity with digital payment processes were major barriers.

3.Inadequate Online Safety Awareness:

A considerable number of respondents reported receiving suspicious messages or links but were unaware of how to report or block fraudulent activities. Understanding of password security and two-factor authentication was limited, increasing vulnerability to cyber threats.

4.Poor Awareness and Usage of Government Digital Services:

Many villagers were not familiar with essential government apps or how to access online schemes, resulting in missed opportunities for socio-economic benefits.

5.Prevalent Social Issues:

Traditional social challenges like early marriage and neglect of road safety norms persisted, affecting community well-being and development.

6.Connectivity and Resource Constraints:

In some areas, internet connectivity was unstable or unavailable, impacting the ability to access digital services regularly. Limited availability of training resources and support mechanisms further constrained digital inclusion.

These problems revealed gaps that needed targeted intervention through well-structured digital literacy and social awareness programs tailored to the local context and need

Short-term and Long-term Action Plan for Problems Identified

Short-Term Action Plan

1. **ConductFocused Digital Literacy Workshops:**

Organize immediate training sessions covering smartphone basics, app usage, digital payments, and online safety for all age groups, especially targeting women and elderly.

2. **Online Safety Awareness Campaigns:**

Launch awareness drives on identifying and reporting digital fraud, creating strong passwords, and using two-factor authentication to enhance cyber safety.

3. **Government App Usage Training:**

Facilitate hands-on workshops on how to download, navigate, and utilize government apps and schemes effectively.

4. **Community Engagement & Support:**

Establish village-level digital help desks and appoint 'digital ambassadors' from youth volunteers to support ongoing digital learning.

5. **Infrastructure Check and Interim Solutions:**

Work with service providers to diagnose and address connectivity issues; provide interim offline digital education resources where needed.

Long-Term Action Plan

1. **Develop Continuous Learning Centers:**

Set up permanent digital resource and training centers in the village with internet access, computers, and teaching support.

2. **Improve Village Connectivity:**

Collaborate with telecom bodies and local government to expand reliable internet infrastructure and affordable access.

3. **Sustain Social Awareness Programs:**

Implement ongoing campaigns addressing social issues like early marriage, health, and safety through schools, community groups, and local leaders.

4. **Formalize Digital Ambassador Programs:**

Train and incentivize local youth as official digital literacy facilitators to maintain momentum and provide sustainable peer support.

5. **Policy Engagement and Support:**

Recommend that authorities include the village in broader digital inclusion schemes and provide funding/support for training and infrastructure enhancement.

6. **Monitor and Evaluate Progress:**

Establish mechanisms for periodic impact evaluation and feedback gathering to adapt programs for maximum community benefit.

These action plans could be proposed to local governing bodies, NGOs, and development agencies for implementation consideration and support toward enhancing the village's digital and social wellbeing.

Description of Community Awareness Programmes Conducted and Their Outcomes:-

Based on the problems identified through the socio-economic survey and community interactions, several targeted awareness programs were designed and conducted in Chevutur village. The programs aimed to address digital literacy gaps, online safety concerns, government service awareness, and social issues, fostering empowerment and informed decision-making among villagers.

1. Digital Literacy and Smartphone Usage Workshops

Purpose: To familiarize villagers, especially women and elderly, with smartphone operations, installing apps, connecting to the internet, and using digital payments confidently.

Outcome: Participants showed significant improvement in basic smartphone skills and increased confidence in performing digital transactions independently.

2. Online Safety Awareness Campaigns

Purpose: To educate the community on recognizing fraudulent messages, blocking/reporting scams, and adopting strong passwords and two-factor authentication practices.

Outcome: There was a noticeable increase in awareness about cyber threats, with more users reporting suspicious activities and securing their devices better.

3. Government Digital Services Training

Purpose: To introduce and demonstrate government apps such as DigiLocker, Aarogya Setu, UMANG, and how to access government schemes online.

Outcome: Many villagers gained the necessary skills to navigate government platforms, leading to enhanced access to benefits and services.

4. Social Awareness Sessions

Purpose: To address crucial social topics like the risks of early marriage and the importance of road safety.

Outcome: These sessions sparked community discussions, leading to greater consciousness and gradual positive behavioral changes.

5. Follow-Up and Support Mechanisms

Purpose: To provide ongoing help through digital ambassadors and community resource centers, ensuring continual learning and problem-solving.

Outcome: Sustained participation and increasing digital engagement across demographics were observed, consolidating the project's long-term impact.

These programs combined education, hands-on practice, and community participation to overcome digital and social challenges effectively, paving the way for a more informed village.

Report of the Mini-Project Work Done Related to the Habitation/Village:-

Title: Enhancing Digital Literacy and Social Awareness in Chevutur Village.

1. Introduction

In the evolving digital landscape, rural communities often face challenges in keeping pace with technology despite increasing smartphone penetration. Chevutur village is no exception, where many residents own smartphones but lack sufficient digital skills and awareness to maximize their benefits safely. This mini-project was undertaken to assess digital literacy, identify gaps, and deliver community-centric educational interventions. The initiative also addressed key social issues affecting the village, aiming to empower residents digitally and socially.

2. Objectives

The primary objectives were:

- To evaluate the socio-economic and digital literacy baseline of Chevutur villagers.
- To identify challenges in digital tool usage and social practices.
- To design and conduct workshops and awareness sessions relevant to identified needs.
- To enhance safe and confident digital engagement, including government service access.
- To raise awareness of local social concerns like early marriage and road safety.

3. Methodology

The methodology involved a mix of quantitative and qualitative approaches:

- **Socio-Economic and Digital Literacy Survey:**
  Using a structured questionnaire administered in Telugu, data was gathered on demographics, education, smartphone usage, digital payment habits, online safety knowledge, and awareness of government digital services.

- **Focus Group Discussions and Interactive Training:**
  Small group sessions allowed in-depth discussions and hands-on learning, reinforcing digital skills and social awareness topics.

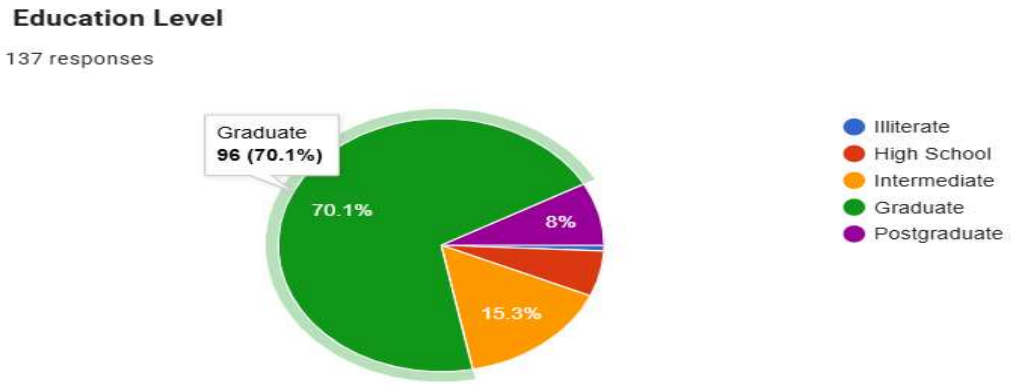

- **Community Awareness Campaigns:**
  Programs targeting broad community involvement, emphasizing online safety, government services, and social issues.

- **Follow-Up & Monitoring:**
  Regular check-ins and refresher sessions helped track progress and address ongoing challenges.

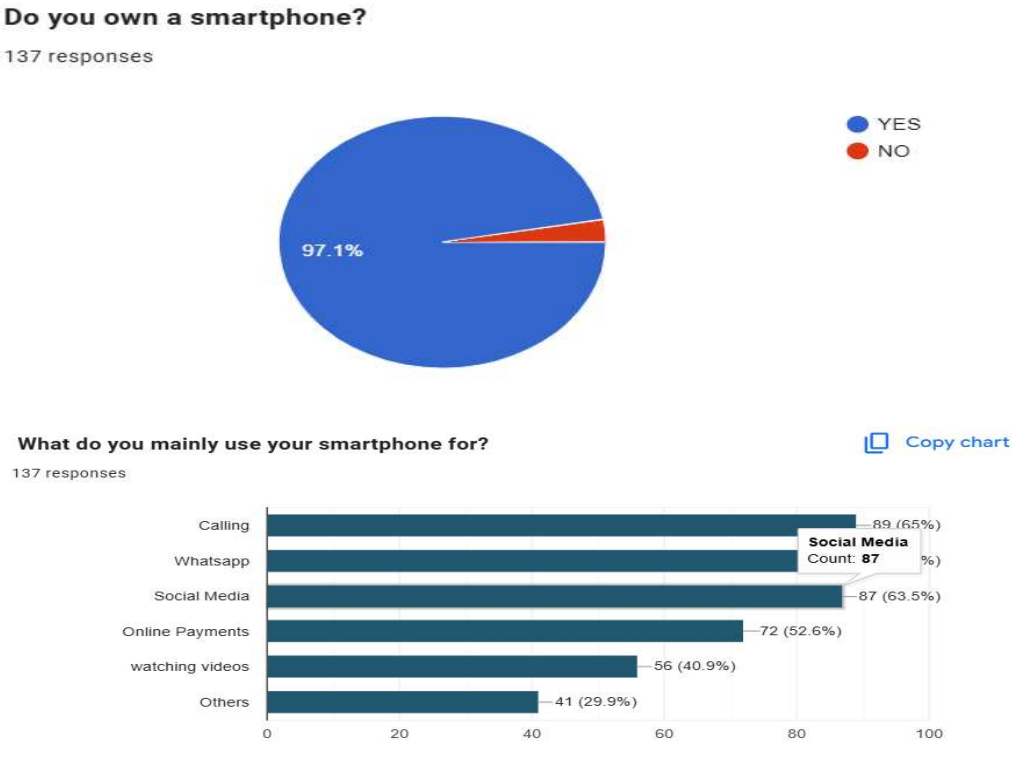

4. Survey Findings and Analysis

The survey revealed important insights into the community's status and needs:

- **Demographic Profile:**
  Participants ranged from teenagers to elderly, representing a balanced gender mix. Education levels varied with many having high school, intermediate, or graduate-level education.

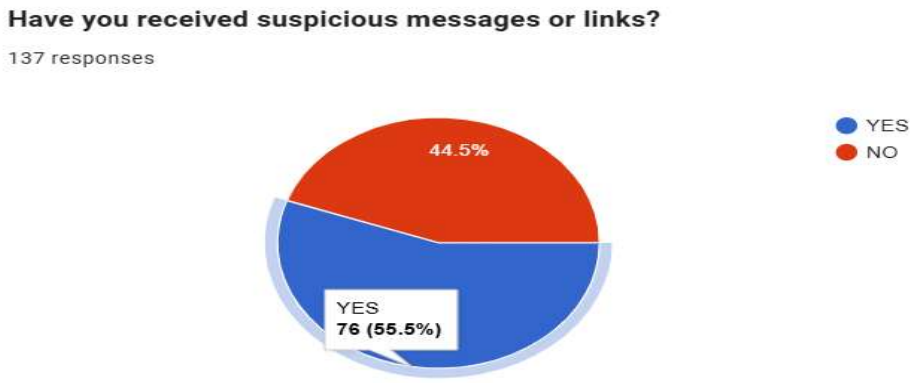

- **Smartphone Ownership and Usage Patterns:**
  All respondents had smartphones. Main activities included voice calls, WhatsApp messaging, social media use, and digital payments.

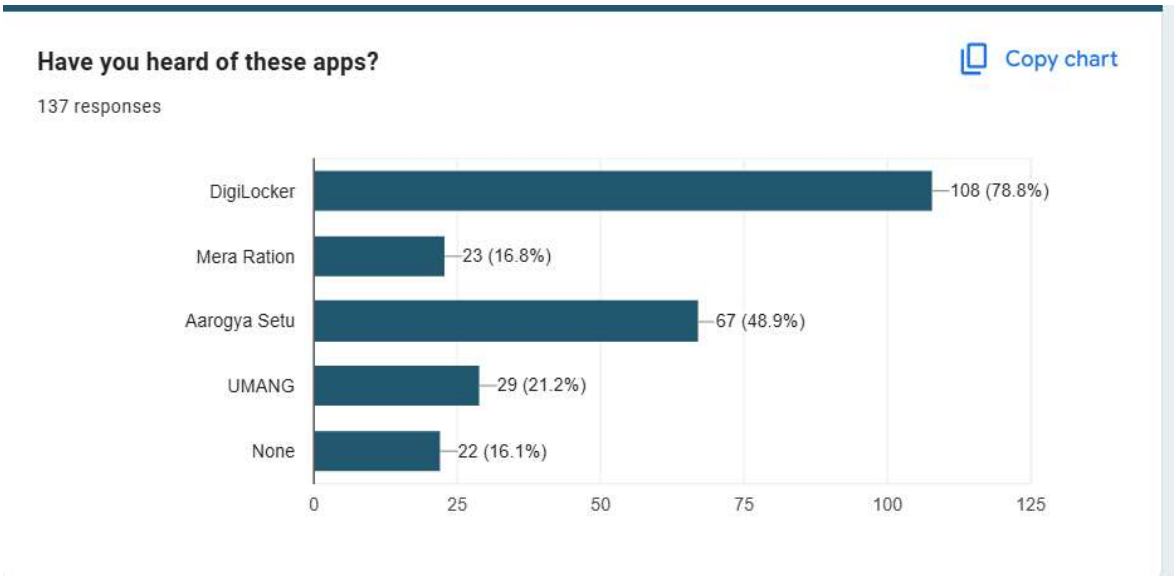

- **Digital Literacy Levels:**
  While many knew basic smartphone operations like installing apps and connecting to Wi-Fi, a considerable proportion lacked these skills

- **Digital Payment Adoption and Confidence:**
  Majority were aware of UPI apps like Google Pay and PhonePe; however, about 30% expressed lack of confidence in using these apps independently due to security fears.

- **Online Safety Awareness:**
  Most villagers had encountered suspicious messages, but many were uncertain about blocking/reporting fraud or about advanced security measures like two-factor authentication.

- **Government Digital Service Awareness:**
  Awareness of key government apps (DigiLocker, Aarogya Setu, UMANG) was moderate, with many unaware of how to use these platforms to access schemes.

5. Interventions Conducted

The project implemented the following community-focused interventions:

- **Basic Digital Literacy Workshops:**
  Covered smartphone operations, app usage, digital payments, and internet connectivity in simple language.
- **Online Safety Training:**
  Focused on recognizing scams, securing accounts, and safe online practices.
- **Government Services Demonstrations:**
  Showcased usage of digital government platforms and enrollment in online schemes.
- **Social Awareness Programs:**
  Engaged all age groups on topics such as early marriage risks and road safety norms.
- **Establishment of Digital Helpdesks:**
  Youth volunteers acted as digital ambassadors, supporting ongoing learning at community centers.

6. Impact and Outcomes

- Participants showed notable improvement in digital skills and confidence in using smartphones and digital payment apps.
- Awareness of online safety increased, leading to better prevention and reporting of fraud.
- Usage and knowledge of government digital services expanded, enhancing socio-economic inclusion.
- Social issues became a topic of community discussion, encouraging positive behavioral changes.
- Ongoing support through helpdesks helped sustain and reinforce digital habits.

CHAPTER 6: RECOMMENDATIONS AND CONCLUSIONS OF THE MINIPROJECT

Recommendations:

1.Expand Digital Literacy Programs:

Building on the success of initial training sessions, it is important to continue and broaden digital literacy programs targeting all community members, with special focus on women and elders who are often marginalized in technology adoption. These programs should cover smartphone usage, digital payments, internet safety, and navigation of critical government applications. Drawing inspiration from models like India's Internet Saathi initiative, local women can be empowered as trainers to effectively bridge social and educational gaps. The content should be culturally relevant, delivered in local languages, and accessible to individuals with varying literacy levels.

2.Establish Digital Resource Centers:

To support ongoing learning and access, permanent digital resource centers should be created within Chevutur. These centers would provide free or affordable internet access, computers or tablets, and trained support staff to help users navigate digital tools and government portals. These centers can act as hubs for digital education, troubleshooting, and social engagement, reducing barriers related to cost and equipment ownership.

3.Improve Infrastructure:

Reliable and affordable internet connectivity is critical to digital inclusion. Collaboration with local authorities, internet service providers, and telecom operators is necessary to enhance broadband infrastructure and mobile network coverage in Chevutur village. Subsidies or financial incentives could be explored to improve affordability, ensuring that economic barriers do not exclude the most vulnerable populations from digital access.

4.Promote Community-led Digital Facilitation:

Train enthusiastic local youth as digital ambassadors who can provide peer-to-peer support in their neighborhoods. These ambassadors will help sustain digital literacy momentum by offering ongoing guidance, troubleshooting assistance, and encouragement. Engaging youth in this facilitation role not only fosters leadership and employment skills but also helps embed digital literacy deeply within community social structures.

5.Sustain Social Awareness Campaigns:

Continuing social campaigns focused on important issues like early marriage prevention and road safety is essential for reinforcing behavioral change. These campaigns can be integrated with digital literacy efforts by using digital platforms and mobile messaging to reach wider audiences consistently. The combination of digital skills and social awareness ensures a holistic approach to community empowerment.

6.Collaborate with Authorities and NGOs:

To scale and fund these initiatives, partnerships with government programs and non-governmental organizations are vital. Leveraging schemes such as the Pradhan Mantri Gramin Digital Saksharta Abhiyan (PMGDISHA) and working alongside NGOs specializing in rural digital inclusion can provide financial support, training resources, and technical expertise. This collaborative model helps ensure program sustainability, accountability, and adaptability to community needs.

Conclusions:
The mini-project successfully identified key barriers to digital literacy and social awareness within the Chevutur community and implemented targeted interventions to address them. As a result, local residents now show increased confidence in using digital tools like smartphones and government service apps securely. This confidence translates to improved access to essential services such as subsidy programs, health information, and digital payments, thereby enhancing their quality of life.

Equally important, the project advanced social awareness around critical issues such as early marriage and road safety, contributing to community dialogue and reflection. By embedding these social messages within digital contexts, the initiative leveraged technology to deepen engagement and support lasting behavioral change.

Sustainable digital empowerment will require continued investment in infrastructure, ongoing education through resource centers, and community-led support, particularly through empowered local youth and women. Drawing on successful large-scale initiatives like Internet Saathi, which trained millions of rural women as digital trainers, can provide valuable frameworks for scaling impact in Chevutur.

In summary, combining infrastructural improvements, inclusive training, social mobilization, and strong partnerships presents a comprehensive path forward for Chevutur to become a digitally empowered, socially aware village. These efforts will build resilience, increase economic opportunities, and support the broader goals of rural development and digital inclusion.

Student Self-Evaluation for the Community Service Project

Please rate your performance in the followingareas:

Rating Scale: **Letter grade of CGPA calculation to be provided**

1	Oralcommunication	1	2	3	4	5
